SUMMARY

Full-stack developer passionate about building responsive and dynamic applications. Skilled in creating both web and mobile applications, with a strong focus on delivering seamless user experiences. Experienced in both front-end and back-end development, including state management, client-side routing, and working with databases, ensuring scalable and efficient solutions across platforms.

TECHNICAL SKILLS

- JavaScript
- React.js
- NextJs
- CSS3
- HTML5

- TypeScript
- RestApi
- Express
- React Native(Expo)
- FireBase

- Tailwind CSS
- SCSS
- Git/GitHub
- Insomnia
- Postman

PROJECTS

BLOG: A Platform for Publishing and Managing Articles
- Built a dynamic front-end with React, enabling seamless navigation using React Router DOM.
- Developed a RESTful API with Node.js and Express, implementing JWT authentication and bcrypt password encryption.
- Designed MongoDB schemas using Mongoose for efficient storage of user data and articles.
- Managed global state with Redux Toolkit for streamlined article management and user profiles.
- Delivered a full-stack platform where users can publish, edit, and delete articles while managing their profiles

MINI NETFLIX CLONE
- Built with Next.js and TypeScript, ensuring scalability and maintainability.
- Implemented authentication with NextAuth and Prisma, securing passwords with bcrypt.
- Developed a responsive UI with SSR/ISR for optimal performance.
- Managed global state efficiently with Zustand and optimized data fetching with SWR.
- Styled the application with Tailwind CSS, ensuring a sleek and adaptive design.

PIZZA ORDERING APPLICATION
- Built with React and Redux Toolkit, ensuring efficient state management and seamless navigation.
- Developed a dynamic shopping cart with item adjustments and real-time price calculation.
- Implemented sorting, filtering, and pagination for an optimized browsing experience.

MESSAGE BOARD
- Built with Next.js, React, and ShadCN, ensuring a modern and responsive UI.
- Developed a backend with Express and Sequelize, integrating MySQL for data storage.
- Implemented state management with Redux Toolkit and styled the UI using Tailwind CSS.
- Gained experience in using Docker for containerized development and deployment.

NATIVE MESSENGER
- Built with React Native and Expo, providing cross-platform support for Android, iOS
- Integrated Firebase Firestore for real-time messaging and Firebase Auth for user authentication.
- Styled the app with NativeWind, ensuring a modern, responsive UI.

REACT NATIVE NOTES
- Built with React Native and Expo, providing a cross-platform note-taking application.
- Integrated Appwrite for secure back-end services, including real-time data syncing and user authentication.
- Implemented a modal feature for adding new notes, allowing users to input note text in a dedicated pop-up window.

LANGUAGES

English – Intermediate/Upper Intermediate   **Polish –** Upper Intermediate

Ukrainian – Native   **Russian –** Fluent

EDUCATION

Spoleczna Akademia Nauk   *October 2022 – February 2026*

- In university, I learned the fundamentals of programming and various software development concepts, including algorithms, data structures, and system design.

AREAS OF EXPERTISE

Proficient in Microsoft Office Suite (Word, Excel, PowerPoint, Teams)
